

# PITCH DECK

by Adam K. Adamu

# Executive Summary

---

VET-SOURCE is a blockchain-powered platform designed to enhance efficiency, transparency, and cost-effectiveness in the veterinary industry by streamlining supply chain management, payments, and record-keeping.

Unlike traditional veterinary procurement and data management solutions, VET-SOURCE leverages blockchain technology to deliver greater security, automation, and cost savings while ensuring compliance and sustainability.

With the global veterinary market exceeding \$120 billion and a rapidly growing demand for digital transformation, VET-SOURCE is positioned to capture a significant share of this expanding market.

# Executive Summary

---

The veterinary industry suffers from inefficiencies, high costs, and a lack of transparency in procurement, payment processing, and record-keeping.

Veterinary clinics struggle with fragmented and outdated supply chain management, leading to increased costs and delays in acquiring essential medical supplies and insurance reimbursement.

Payment processing in the veterinary sector is slow and costly, with high transaction fees and administrative burdens impacting both clinics and pet owners.

# Executive Summary

---

Data management systems lack interoperability and security, making it difficult for veterinarians to access, share, and verify critical patient records efficiently.

With the global veterinary market exceeding \$120 billion and the veterinary software market is projected to grow at a CAGR of 7.45% (Grand View Research, 2023).

VET-SOURCE is positioned to capture a significant share of this rapidly expanding industry.

# The Market

---

## **Served Available Market (SAM)** - UK Veterinary Clinics

SAM Today (2025)

Current UK serviceable market: **£27.3M**

Projected 5% penetration in 5 years: **£1.37M** market share by 2030

Projected SAM for 2030: **£39.1M**

## **Total Available Market (TAM)** - Global Veterinary Clinics

TAM Today (2025)

Global market size: **£682.5M**

Market CAGR: 7.45%

Projected TAM for 2030: **£977.4M**

## Technology / How It Works

- **Secure Data Storage** - Patient records are stored on an immutable blockchain, ensuring data cannot be lost, altered, or hacked.
- **Automated Clinic Operations** - Smart contracts handle scheduling, inventory management, and insurance claims, reducing administrative work and human error.
- **Seamless Payments** - Cryptocurrency and blockchain-based transactions lower fees, speed up payments and ensure fraud-proof transactions.
- **Real-Time Predictive Insights** - AI-powered analytics predict pet health issues based on historical records, enabling proactive treatment.
- **End-to-End Transparency** - Track the supply chain of medications and medical supplies, ensuring authenticity and regulatory compliance.

# Veterinary Blockchain Roadmap

---

## Short & Mid-Term Goals (0-12 Months)

- Capital Raising - Secure £1.5M from VCs, angel investors & crowdfunding
- App & Platform Launch - MVP build, Release mobile app (iOS & Android), integrate blockchain backend
- Pilot Testing – Selected 3-5 UK-based practices to ensure platform adaptability
- Blockchain Foundation - Select & optimize Ethereum/Solana for security & efficiency
- Smart Contracts & Security - Develop & audit transaction & access control contracts
- Beta Testing & Market Validation - Onboard 20+ vet practices & 100+ pet owners, analyze data
- Marketing & Adoption - Target UK veterinarians, pet owners & insurers

# Veterinary Blockchain Roadmap

---

## Long-Term Goals (2-5 Years)

- Funding & Growth - Raise \$10M via Token Generation Event & equity sale
- Exchange & Compliance - Secure IEO listings & obtain global regulatory approvals
- Financial Services - Launch Leap Swap & full cryptocurrency exchange
- Scalability & Expansion - Implement Layer 2 scaling, enter new markets, host meetups
- C-Marketplace - Develop a decentralized platform for pet care transactions

## How VET-SOURCE Differentiates

# Competitive Analysis

## COMPETITIVE POSITIONING CHART

- **Blockchain-Powered Security** - Unlike competitors, VET-SOURCE ensures end-to-end encryption, decentralization, and immutable data records.
- **Smart Contracts & Automation** - Enables secure transactions, automated insurance claims, and fraud prevention.
- **Cryptocurrency & Payments** - The only platform supporting crypto transactions, tokenized incentives, and insurance staking.
- **Comprehensive Platform** - Covers supply chain, secure messaging, patient records, and clinic management - not just appointments.

# Why You Should Not Invest In Us?

---

**New Market Uncertainty** – Crypto adoption in veterinary services is still new.

*Mitigation:* Early partnerships with veterinary clinics, insurers, and regulators to drive awareness and credibility.

**Regulatory Challenges** – Blockchain laws are evolving, posing compliance risks.

*Mitigation:* Proactive engagement with regulators, compliance with GDPR & FCA, and adaptability to new policies.

**Technical Complexity** – Integrating blockchain with existing veterinary systems isn't seamless.

*Mitigation:* User-friendly API integrations and step-by-step onboarding to reduce friction.

# Why You Should Not Invest In Us?

---

**Resource Constraints** – As a startup, we lack the deep pockets of big competitors.

*Mitigation:* Lean operations, targeted funding, and phased scaling to maximize efficiency.

**Competitive Risks** – Other players could replicate some features of our model.

*Mitigation:* First-mover advantage, blockchain IP protections, and continuous data security and automation innovation.

**Crypto Market Volatility** – The value of the blockchain and its adoption depend on market sentiment.

*Mitigation:* Multiple revenue streams, staking mechanisms, and fiat on/off ramps for stability.

**Security Expectations** – Handling financial and medical data means we must be extremely secure.

*Mitigation:* End-to-end encryption, blockchain immutability, and third-party security audits.

---

# Business Model

---

## **Revenue Streams:**

**Subscription Fees** – Monthly fees from veterinarians for services.

**Transaction Fees** – Small charges per cryptocurrency and insurance claim transaction on the blockchain.

**Data Licensing** – Selling anonymized veterinary data to third-party companies for insights and product development.

## **Marketing Strategy:**

**Online Advertising** – Targeted ads for veterinarians, pet owners, and animal shelters on relevant platforms.

**Public Relations** – Press releases and media coverage to increase awareness.

**Industry Events** – Participation in veterinary conferences & trade shows.

**Strategic Partnerships** – Collaborations with veterinary associations, insurers, and animal charities to expand adoption.

# Go To Market Strategy

---

## **Strategic Partnerships**

Collaborating with veterinary associations, tech providers & animal welfare organizations.

## **Targeted Marketing & Outreach**

Engaging through veterinary publications, online communities & industry trade shows.

## **Pilot Programs & Early Adoption**

Launching pilot initiatives with select veterinary professionals to refine our solution.

## **Community-Driven Growth**

Building an engaged network of users & stakeholders to drive adoption.

## **Focused Market Entry Strategy**

Gaining traction through key industry professionals before scaling.
